

AIRLANE PNEUMATICS LIMITED

Airlane are...

Pneumatic & Automation
Specialists

Your problems solved!

Born from over 50 years experience servicing industry we are 100% committed to supplying highly efficient, cost effective solutions using leading edge technologies to improve manufacturing output and reduce environmental legacies.

Airlane expertise...

....and wealth of experience covers the following industries: -

Plastic pipe manufacture
Special purpose machine builders
Timber processing
Construction industry
OEM design & manufacturing plants
Food & Pharmaceuticals
Foundries, smelting plants & forges
Heavy engineering
Industrial laundry services
Resale & distribution
Offshore industries
Process industries
Leisure & retail outlets
Vacuum forming
etc. etc. etc.

Have a look at some of the products and services we supply at: -

Breathable Compressed Air

These packages typically provide air quality to a higher standard than that required in BS4275: 1997.

Available with 1/4" & 3/8" connections

Oil Water Separators 'Pure & Simple'

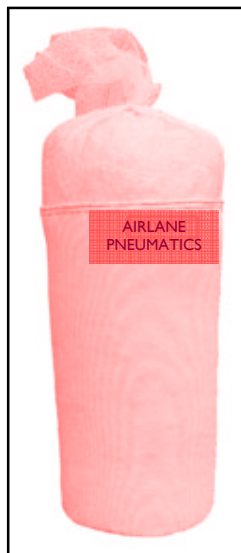

Designed to limit the environmental damage caused by poor condensate management.

The simple design is quickly installed and allows air compressor users to economically comply with the strict environmental regulations as written in the Water Resources Act 1991.

This act states that it is an offence to knowingly allow toxic waste to enter surface or ground water.

Compressed air condensate falls into this category, this offence carries a maximum fine of £20,000

Available in 100, 300 & 750 CFM versions

Replacement Carbon Bags

The majority of oil water separators use bags of activated carbon as the final cleaning element for the compressor condensate. The effectiveness of the separator depends upon those bags being changed before they become saturated with oil.

Our range is produced to a high specification using activated carbon from renewable sources and tested to ASTM D 3467.

We offers carbon bag sets to fit the following oil water separators: -

Beko Domnick Hunter Ultrafilter Zander Hankison
Atlas Copco BEA Jorc MTA OMI Worthington ABAC.

We can also offer Test Kits to monitor the effectiveness of Oil Water Separators

Air Saver

Prevents stored compressed air leaking when factory is shut down.
